

Instructions for editing the latex files on Overleaf

Here are the directions that will help you to put the files you need for your dissertation on Overleaf.

1. Go to <https://www.overleaf.com/>. You can sign up an account or sign up with your Twitter or google account

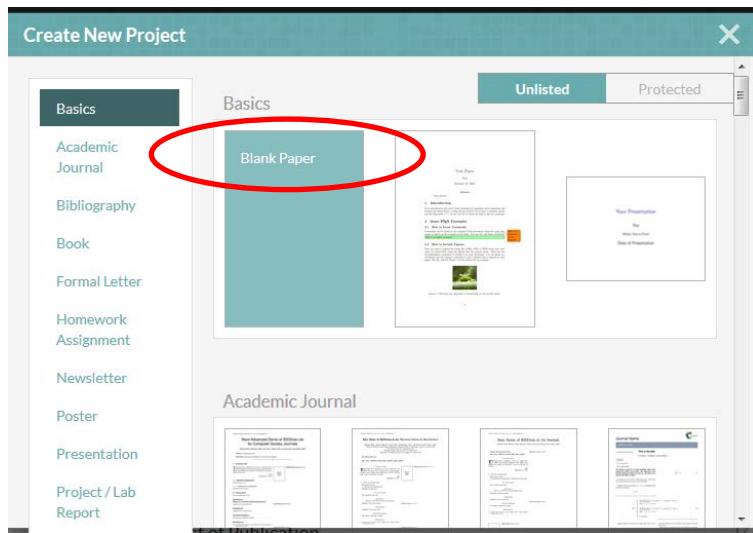

2. After you sing in Overleaf, you should see the following page.

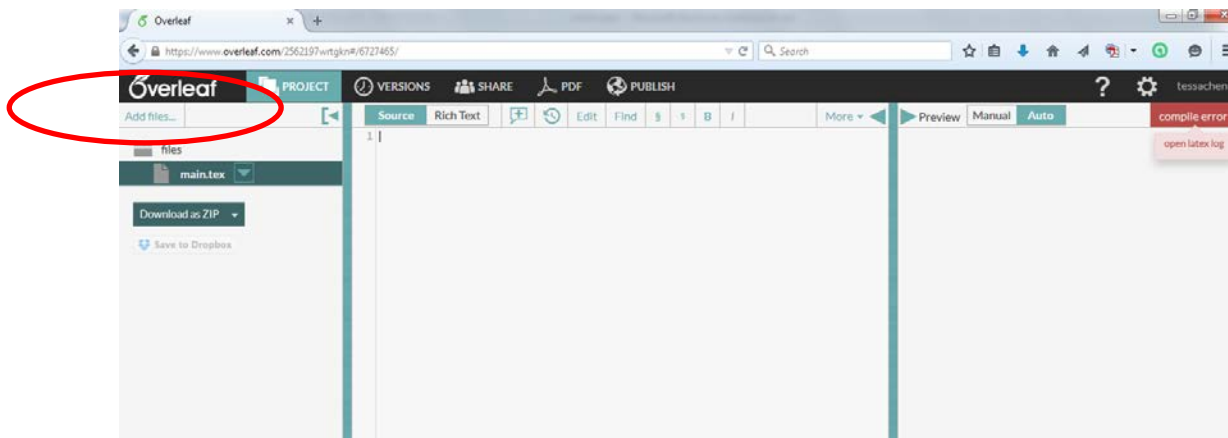

Instructions for editing the latex files on Overleaf

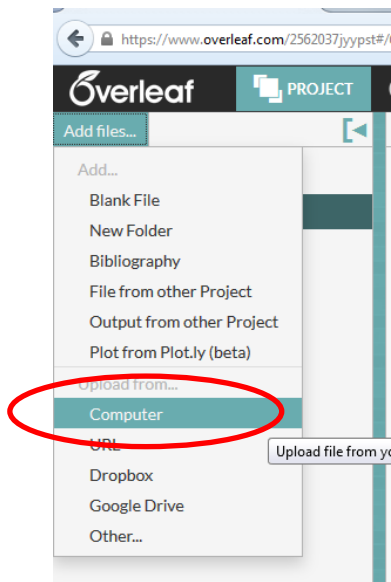

3. Click NEW PROJECT → Basics → Blank Paper

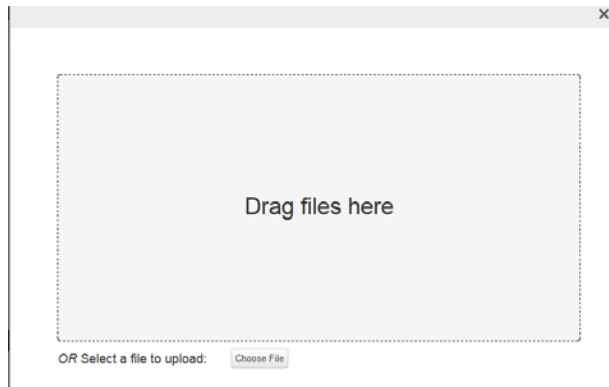

4. You should see this page

5. Click Add files → Computer

6. You will see the following page. Upload all files you need. Don't forget to upload BGSU.cls and reference.bib if you want to use BibTeX for the bibliography.

7. Now, you should see many files on the left side of window and the **compile error** message on the top right corner.

8. The main.tex is the main file where you can see the output of your dissertation. You will see a warning message on the top right corner, **it doesn't matter**. You can start to place the contents on main.tex, "acknowledgements", "abstract", "chapter1-chapter5", and "appendix". **When you click the main.tex, the output will show up on the right side of window.**
9. You don't have to save your work. The system saves your work automatically. You can share your files with link by clicking SHARE on the top or view/download a PDF of output by clicking PDF.
